TESTIMONIAL

COACHING DYNAMICS

JULY 2017

We have worked with Tina since February 2016 having initially been introduced through the Growth Accelerator programme. We met a number of Business Coaches before appointing Tina, as we felt it was important that whoever we chose we could work with effectively.

We have now worked with Tina for just over a year, and have been very impressed at how quickly she has been able to fully understand the detail of our business. She has brought a wealth of valuable information and experience to ensure our business growth is sustainable. Initially we worked through the Growth Accelerator program to develop a 3 year strategy to take the company forward. In developing the strategy we found ourselves discussing wider issues which have helped in developing the company.

Whilst we have now completed the Growth Accelerator programme, the strategy was shared and developed further with the wider management team. We continue to benefit from further coaching sessions and are now working with Tina on Management training and other business improvement strategies to improve the business as we grow, and maintain the positive results we have already started to see.
